ABHINAV SUJIL

Cybersecurity Engineer | Cloud IAM Security, AppSec & Threat Detection

Bengaluru, Karnataka • +91 90374 81231 • abhinavsujil1231@gmail.com • linkedin.com/in/abhinav-sujil • github.com/abhinavsujil

PROFESSIONAL SUMMARY

Cybersecurity engineer with hands-on experience in Cloud Infrastructure Entitlement Management (CIEM), AWS IAM toxic combination analysis, and SIEM detection engineering (Wazuh, Sysmon). Creator and lead developer of H2O OMS, a multi-tenant queue/CRM platform operating in live pilot at an Akshaya center serving 100+ citizens daily. Background in defense R&D embedded machine learning at DRDO STARC. Google Cybersecurity certified, CEH v12 in progress.

TECHNICAL SKILLS

Cloud Security & CIEM: AWS IAM Policy Analysis, Toxic Combinations, EC2 IMDSv1/v2, Attack Path Graphing, Principle of Least Privilege.

Detection & Security Operations: Wazuh SIEM, Microsoft Sysmon, Windows Event Logs, Linux Auditd, MITRE ATT&CK Framework.

Vulnerability Assessment & AppSec: Burp Suite, Nmap, OWASP Top 10, Multi-Tenant Row-Level Security (RLS), HMAC Authentication, REST APIs.

Frameworks & Standards: NIST SP 800-61 Rev. 2, NIST SP 800-115, CIS AWS Foundations Benchmark, MITRE ATT&CK Cloud Matrix.

Programming & Engineering: Python (Security Tooling, AST Policy Parsing, OpenCV), JavaScript/TypeScript (Next.js, Node.js), PostgreSQL/Prisma, Bash.

WORK EXPERIENCE

SOFTMASON TECHNOLOGIES — **Bengaluru, Karnataka**
Cybersecurity Engineer — *Sep 2026 - Present*

- Undergoing structured engineering onboarding and application security training focusing on secure web architectures, OWASP Top 10, and API authentication.
- Shadowing security assessments across internal staging environments and web application modules, evaluating input validation and authorization boundaries.

CYBORGMINDSET.AI — **Bengaluru, Karnataka**
AI Engineer — *Oct 2025 - Nov 2025*

- Engineered automated workflow integrations using REST APIs; audited and secured endpoints by enforcing API token validation and least-privilege access.

DRDO, STARC (SITAR) — **Bengaluru, Karnataka**
Technical Intern, Design & Development — *Apr 2025 - Aug 2025*

- Engineered a real-time acoustic drone detection system using machine learning and deep learning, raising detection accuracy from 75% to 92% via spectrogram filtering.
- Deployed ML classification models onto low-power embedded hardware with real-time inference latency under air-gapped defense data security protocols.

AIROBOSOFT PRODUCTS AND SERVICES — **Bengaluru, Karnataka**
Software Developer Intern — *Nov 2023 - Dec 2023*

- Engineered a real-time AI criminal identification and surveillance pipeline using Python and OpenCV (~90% accuracy on live video feeds) that alerts on unauthorized individuals.

SECURITY PROJECTS & LABS

AWS Cloud IAM Toxic Combination & EC2 Privilege Escalation Lab — **github.com/abhinavsujil/cloud-iam-privesc-lab**
Python (AST Parser), AWS IAM, EC2 IMDSv1/v2, SSRF Exploitation, MITRE ATT&CK T1078.004 — *Cloud Security Project*

- Simulated an end-to-end cloud attack chain: SSRF exfiltration of temporary STS credentials via EC2 IMDSv1 leading to administrative privilege escalation.
- Exploited toxic permission combinations (iam:PassRole + ec2:RunInstances) to launch an unauthorized EC2 instance with administrative UserData persistence.
- Developed an automated Python CIEM detector that ingests IAM policy JSONs, discovers toxic entitlement pairs, and generates ASCII attack-path graphs.
- Documented remediation baselines enforcing IMDSv2 hop limits, strict AMI/subnet ARN scoping on RunInstances, and iam:PassedToService condition constraints.

H2O OMS (Happy 2 Organise), Multi-Tenant CRM & Queue Platform — **Lead Developer**
Next.js, Node.js/Express, PostgreSQL (Prisma RLS), Cloudflare Workers, Custom Hardware — *Live Pilot at Akshaya Center*

- Built and deployed an end-to-end multi-tenant CRM and queue platform for Akshaya centers; live pilot currently serves 100+ citizens daily.
- Secured distributed physical service terminals through an edge proxy using per-device HMAC-signed request authentication.
- Conducted a 22-item security audit of the platform codebase; identified and resolved a multi-tenant isolation flaw where client devices shared one backend key.
- Addressed an information disclosure vulnerability in the service health endpoint that leaked device key hashes to unauthenticated queries.

EDUCATION

MVJ COLLEGE OF ENGINEERING — **Bengaluru, Karnataka**
Bachelor of Engineering (B.E.) in Computer Science & Engineering (CGPA 7.9) — *2021 - 2025*

CERTIFICATIONS

- **Certified Ethical Hacker (CEH v12)**, EC-Council (In Progress)
- **Google Cybersecurity Professional Certificate**, Coursera (Completed Nov 2024)
- **Hands-On Labs & Practice:** PortSwigger Web Security Academy, TryHackMe CTFs, OWASP Top 10 web labs.
